GLOBAL POSITIONING SYSTEM

1. All facility locations are to be determined using GPS.
2. The contractor shall follow the procedures outlined in SOP number 2110.3A.
3. The contractor shall follow the principles for collecting and documenting coordinates using the "Locational Data Policy Implementation Guidance" dated 04/30/93.
4. For consistency, the facility location should be obtained at one of the following locations at the facility. These locations are listed in priority order. Lower priority locations should only be used if the higher priority locations are not available.
 - a. The center of the main entry road or driveway leading to the plant entrance or office. This location must be off of the street the facility is located on as opposed to a side street.
 - b. In front of the main door to the plant or office near or next to the street or parking lot.
 - c. Other locations at the facility.
5. In some cases and due to the physical location of the facility, it may not be feasible to operate the GPS equipment directly at the location identified in paragraph 4 above (location station). In such cases, the GPS reading may be obtained at a temporary station adjacent the location station and the direction and distance to and from the temporary station to the location station be obtained and recorded. Measurements should be taken to the nearest centimeter or 1/2 inch. Directions should be measured to the nearest degree. The temporary station should be within 50 feet of the location station.
